

Student: _____ Teacher: _____

Date: _____ Grade: _____

Build Accuracy and Fluency Naming Numbers 0-10 **(Child must know number names 0-4 before starting this intervention)**

This intervention is designed to **build fluency with number names**. Requires less than 10 minutes each day. Child must know 4 number names to begin this intervention.

Materials Needed: digital count-down timer, this intervention protocol, materials for practicing responding, a pencil, progress monitoring chart, and a weekly progress monitoring probe.

Teacher Coach Card: (complete these steps every day)

_____ Sit with child in a quiet corner of the classroom.

_____ Complete the number names assessment.

_____ Say, **“I am going to show you some numbers. When I point to a number, you tell me the number name. Okay? Let’s begin.”** Point to the first number. This will be a “known” number. When the child responds correctly, point to the second number. This will be an unknown number. If the child does not respond, tell the child, **“Say [name the number for the child].”**

_____ Continue pointing to each number from left to right exactly in the order that they are printed. Go through the list of numbers 3 times. The order is important—do not mix up!

_____ On the last run-through, keep track of the “unknown” number (see progress monitoring chart). Did the child get that number right all 5 times? Note this on the Progress Monitoring Chart. This step is very important because it will tell us what to do tomorrow.

_____ Complete the Count Objects to 10- Build Fluency Intervention (attached).
